William Fox-Pitt
World Leading Event Rider

Andreas Wohler
Trainer of Melbourne Cup Winner "Protectionist"

"I find the Activo-Med rug hugely benefits the horses' suppleness and makes the sharper horses quieter and softer to ride. I definitely feel I get better results from the horses when using the Activo-Med Combi rug and both the horses and I would be lost without it."

Ben Maher, World leading Showjumper.

ACTIVO-MED

ANIMAL
THERAPEUTICS

ACTIVO MED THERAPY SYSTEM

Impulse line: 2 proven therapies - One world renowned system

"Valegro and Uthopia have the Activo-Med rug on every day which completely relaxes them throughout the treatment. These rugs to me are unique, as they enhance the performance of sports horses, keeping them feeling supple, flexible and recovered, which all helps them perform at their best in the arena."

ACTIVO MED THERAPY SYSTEM

COMBI PRO RUG

COMBINING PEMF + CYCLONIC MASSAGE

For improved suppleness, muscle tone and overall condition. Use the rug daily to help support your horse's performance potential at home and at competitions.

This highly effective system combines pulsed electromagnetic field therapy (PEMF) with cyclonic massage and works from poll to tail, including shoulder and stifle areas.

It couldn't be easier to use - just select a pre-set program and the rug does the rest. Whether you want to use the rug to support performance or as part of a rehabilitation program, the control box has the correct program.

As an extra benefit, the control box also operates other Activo-Med equipment such as leg wraps and light therapy clusters, pens and pads.

Why PEMF?

The Activo-Med Combi Pro contains 19 strategically placed copper coils that generate therapeutic PEMF frequencies to promote cell efficiency and repair to support performance and recovery.

Why cyclonic massage?

The 14 powerful modules in the Activo-Med Combi Pro are specially sequenced to create an effective cyclonic massage that supports circulation and the lymphatic system.

THE RUG CAN HELP TO

- ✓ Improve muscle tone and overall condition.
- ✓ Improve flexibility and suppleness.
